Past Encounters

Encounter ID	Performer	Location	Encounter Start Date	Encounter Closed Date	Diagnosis/Indication	Diagnosis SNOMED-CT Code	Diagnosis ICD10 Code	Diagnosis Note
29271926	Patrick D Reibold, MD	zCLSD_IND_SMG_NEU_Logansport_DOC 12 Chase Park Logansport, IN 46947-1553	08/04/2021 10:00:15	08/04/2021 13:16:15	Intracranial aneurysm	128609009	I67.1	I report small intracranial aneurysms. I told her she will need a repeat CT angiogram next year or so. The patient is on Plavix and aspirin for stroke prevention we will continue with. I will see her in follow-up in 6 months.
31552088	Patrick D Reibold, MD	zCLSD_IND_SMG_NEU_Logansport_DOC 12 Chase Park Logansport, IN 46947-1553	03/16/2022 10:46:06	03/18/2022 08:02:04	Headache	25064002	R51.9	Reported abnormalities on MRA without neurologic symptoms at this point. We will set her up for repeat CT angiogram of the head if this is negative I do not think we need to pursue this any further we will see her in follow-up in the future when needed.
37104190	George Sheng, MD	IND_SMG_KVS_DOC 313 S Berkley Rd, Suite 120 KOKOMO, IN 46901-5114	11/20/2023 09:54:11	11/20/2023 10:51:23	Bilateral stenosis of carotid arteries	787044009	I65.23	
40795780	Katiri Elkins, NP	IND_SMG_KVS_DOC 313 S Berkley Rd, Suite 120 KOKOMO, IN 46901-5114	12/13/2024 09:02:26	12/13/2024 09:58:01	Bilateral stenosis of carotid arteries	787044009	I65.23	Ms. Berry underwent a carotid duplex. This showed a mild right internal carotid stenosis of less than 50%. On the left side, she has a moderate stenosis in the range of 50 to 69%. These velocities compared to her outside study have significantly increased, but still remain less than 80% and asymptomatic. The signs and symptoms of a TIA and stroke have been reviewed with her and she knows to seek immediate medical attention via her closest emergency room if she should exhibit any of these symptoms. If

no concerns arise in the interim, I have encouraged the ongoing use of her antiplatelet and statin therapy. I have asked to see her back in 6 months for ongoing follow-up with a carotid duplex. She is in agreement with this plan of care and voices no further questions at this time.

Notes

Date	Note Type	Note	Provider Name and Address	Organization Details	Recorded Time
08/04/2021	text/html	68-year-old with previous history of stroke and question of very small aneurysms. She was formally a patient of Dr. Lee and old records are lacking at this point. She reports having a neurologic episode some 10 years ago that resolved letter V records regarding that sounds like she may have been given TPA and shipped to Fort Wayne. While under the care of Dr. Lee she had an MR angiogram which apparently revealed 2 very small aneurysms approximately 3 mm. She was evaluated by neurosurgery who was not impressed with these and recommended that she have follow-up in a couple years.	Patrick D Reibold, MD 250 W 96th St, Suite 520, Indianapolis, IN, 46260-4803, US	IN - Ascension - Indiana	08/04/2021 13:14:23
03/16/2022	text/html	Follow-up history of stroke and questionable aneurysm. Since last visit the patient has been neurologically stable she has not had any new neurologic symptoms. Blood pressures been under control. She continues on aspirin and Plavix. Patient saw neurosurgery a year or 2 ago and her son mention of possible cavernoma's the report I have the MR 8 performed at Logansport Memorial years ago was normal. There is a recommendation that she have a CTA in a couple years.	Patrick D Reibold, MD 250 W 96th St, Suite 520, Indianapolis, IN, 46260-4803, US	IN - Ascension - Indiana	03/16/2022 11:23:35
11/20/2023	text/html	80-year-old patient presented to my office today for evaluation with regard to bilateral carotid stenosis and this was incidentally noticed on recent ultrasound. She denies any symptoms related to this she had mild-moderate stenosis on the left side versus the right side.	George Sheng, MD 250 W 96th St, Suite 520, Indianapolis, IN, 46260-4803, US	IN - Ascension - Indiana	11/20/2023 10:44:35
12/13/2024	text/html	Ms. Berry is a pleasant 71-year-old patient of Dr. Sheng who he met as a new patient last year with a carotid ultrasound stating mild bilateral carotid artery occlusive disease on an outside study. She returns today. She denies any focal neurologic changes consistent with a TIA or stroke or any episodes of amaurosis fugax. She denies any chest pain or shortness of breath. She continues with her antiplatelet and statin therapy. She is currently eating a vegetarian diet and trying to take very good care of herself. She denies any interval health changes or hospitalizations.	Katiri Elkins, NP 250 W 96th St, Suite 520, Indianapolis, IN, 46260-4803, US	IN - Ascension - Indiana	12/13/2024 09:58:20
